Statement of Purpose

Thank you for providing me this opportunity to pen down my sop. Now, I introduce myself as a student of the undergraduate program in Humanities and Social Science at **Mahendra Multiple Campus** (accredited by TU), Dang, Nepal. I wish to pursue my graduate studies (Bachelor Degree in IT) in your esteemed College.

I have never been the only one to struggle for survival but have always sought to try and stand ahead in every facet of my life. Since school I have believed in hard work that little bit of extra effort, which has helped me realize my goals at every stage. In the ever-changing world of Technology, where each new day sees a spate of new concepts and applications, I want to attain the highest level of education and place myself in line with opportunities where I can work on the cutting edge. My fundamental reason for wanting to pursue graduation in Information Technology is my passion to reach the zenith in my chosen field of study and attain perfection in anything I undertake.

An unquenchable thirst for knowledge coupled with an inherent drive to do something different have always been the propelling factors influencing my choices, eventually placing me at the portal of such a challenging line of study. Schooling infused in me a keen sense of analytical reasoning and scientific temperament. Consistent academic performance and good grades were a means to an end for me .

Since it is IT that brings about a continuous improvement in the technology, I chose it as my undergraduate major. I have gained a thorough understanding of the various facets of IT field .

Education, if chosen and which I do, is an unending process. Excellence in any sphere of life can be achieved with hard work, determination and dedication. Yet, the lack of in-depth knowledge of the subject leaves the conceptual skills incomplete. Therefore, I would like to pursue a course that not only supplements the knowledge I possess, but also provide a strong foundation for my research oriented study, which would allow me to explore the unknown in this science of IT.

My interest in IT stems from the fact that it holds good opportunities and provides a wide scope for research. I have been fascinated by the type of practical challenges it posses .An effective practice in IT demands the aspect of analyzing, thinking logically and visualizing the impacts of a problem.

Apart from having the academic proficiency, I was actively involved in extra-curricular activities and sports, right from my schooling..

I aver that I possess the intellectual ability and the preparation to set out on an exhilarating and arduous path of graduate study at your university. I am sure that my aptitude and drive will see me through the challenge and I am convinced that my study at your department would be a rewarding experience. I look forward to have a long and beneficial association with your esteemed College with sufficient financial support.

Finally I take this opportunity to thank you for allowing me to express myself and I look forward for my admission into the graduate program of your esteemed university.
